Tucker University - Corner Beam
May 2018

Cutting chart for 4" Finished Units

Corner Beam Units (picture above)

Side Triangles – Cut a 5" strip of WOF (width of fabric)

Center Beam – Cut (4) 5" Squares

Sliver Units (picture above)

Squares for Half Square Blocks (see special note below):

Light – cut (4) 5 ½" squares

Dark – cut (4) 5 ½" squares

Side Triangles – Cut a 5" strip of WOF of a lighter fabric than the dark fabric listed above. It can be the same as Light for a 2 color sliver. Or chose another color other than the light and you will have a 3 color sliver.

Special Note: Please prepare (8) half square triangles prior to class for making the sliver unit. The starting squares are to be 5 ½". Please DO NOT trim down or square up these (8) units. You are encouraged to use Deb Tucker's method of creating half square triangles from your Tucker Trimmer I Instruction set or you can refer back to class 1-101.

*The fabric required to create (8) half square triangles is **not** included in the regular fabric requirements.*
